

INTERNETWORKING Case Study Report Guide

You are required to submit a report with a minimum of **2500 words** that includes the following sections:

- **Introduction (10%)**

- Explain the main idea or the main goal of the research.
- Discuss essential points about WAN technologies.
- Give a clear background about the selected WAN technologies.

- **Operation of technologies (20%)**

- This section should clearly document how the selected WAN technologies operate.
- Include figures/diagrams and examples to support discussion.

- **Analysis (15%)**

- Analyze the operation and performance of the selected technologies.
- Evaluate their advantages and disadvantages.
- Include a summary of the analysis.

- **Discussion (25%)**

- Reflect on the analysis done and discuss your own ideas or solution to address issues identified.
- Discuss the challenges that you and your team may face in implementing these technologies in your network upgrade. Explain how will your team deal with these challenges.
- Support your discussion with information from academic sources.

- **Conclusion (10%)**

- Summarize your overall undertaking and insight of the topics.
- Include a brief discussion about the outcome of the study.

- **Recommendation (10%)**

- Based on your analysis and discussion, recommend the most suitable solution for a network upgrade project. Justify your recommendation.
- Include suggestions for improvement and future studies.

- **References (10%)**

- Minimum of ten (10) relevant academic sources using Harvard Referencing format.
