Assessment task

- Reflecting on your clinical placement as a third-year undergraduate nursing student, identify an area of competence development that will assist you in transitioning into your future role as a registered nurse.
- Identify and describe evidence-based strategies that will contribute in developing your competence in this area that will contribute to you successfully achieving graduate nurse professional standards for practice.

Assessment directions:

Aspects to be covered this assessment are:

- An introduction to identify what will be covered in this part of your assessment (100 words)
- Identifying and describing one area of professional practice that requires competency development (250 words)
- Consider and integrate the Nursing & Midwifery Board of Australia's Registered Nurse Standards for Practice and other literature to inform your evidence-based strategies (750 words)
- A conclusion that summarizes main findings from the body of your essay and presents final recommendations (100 words)

NURS 3041   Becoming a Registered Nurse

Assessment guidelines

- Use of first-person tense can be used when identifying an area of professional practice competency. Please write in **third** person for other areas of the assessment
- Cite relevant references where appropriate using UniSA Harvard intext referencing and reference list
- Follow the School's Academic Writing Requirements
- Headings are acceptable

Figures, tables and references are not part of the word count but can be included.
